Course Overview

This Certified Data Privacy Solutions Professional (CDPSP) training course is designed to provide participants with a solid foundation in managing and safeguarding personal data across various organizational contexts. Through a detailed examination of global privacy regulations, governance frameworks, and risk management practices, participants will learn how to design and implement effective data protection strategies. The course emphasizes practical application, helping individuals understand the operational impact of privacy requirements and how to embed compliance into day-to-day business processes.

Course Objectives

By the end of this course, participants will be able to:

- Gain a thorough understanding of data protection laws and regulations.
- Learn to implement and manage effective privacy frameworks and controls.
- Develop skills to assess and mitigate data privacy risks.
- Prepare for data privacy certification exams.

Target Audience

This course is suitable for a wide range of professionals, particularly:

- Data Protection Officers (DPOs)
- Privacy compliance professionals
- IT security managers
- Anyone preparing for data privacy certifications

Methodology

This training course uses a variety of proven adult learning techniques to ensure maximum understanding, comprehension, and retention of the information presented. The course is interactive and encourages critical thinking. The instructor will guide and facilitate learning through:

- Lectures and direct input
- Group discussions and case studies

Hands-on exercises and scenario-based activities

Video presentations

The skills developed will add value to employees, managers, and leaders alike.

Course Outline

Day One: Data Protection Laws and Regulations

Overview of major global data protection laws (GDPR, CCPA, etc.)

Key legal requirements and organizational obligations

Strategies for implementing compliance programs

Case studies of successful compliance implementations

Interactive session: Developing a compliance strategy for your organization

Day Two: Privacy Frameworks and Controls

Principles of Privacy by Design and Privacy by Default

Developing and implementing effective privacy frameworks

Techniques for data minimization and anonymization

Best practices for privacy impact assessments (PIAs)

Interactive session: Designing a privacy framework for a sample organization

Day Three: Managing Data Privacy Risks

Identifying and assessing privacy risks

Developing risk mitigation strategies

Incident response and breach management in the context of data privacy

Case studies of data privacy risk management

Interactive session: Conducting a privacy risk assessment and developing a mitigation plan

Day Four: Data Privacy Governance

Establishing a data privacy governance structure

Roles and responsibilities in data privacy management

Continuous monitoring and improvement of privacy practices

Reporting and communicating privacy practices to stakeholders

Interactive session: Developing a governance structure for data privacy

Day Five: Certification Exam Preparation

Overview of data privacy certification exams (CDPSE, etc.)

Detailed review of exam domains and key topics

Study tips, resources, and practice questions

Interactive session: Practice exams and group review

Personalized study plans and final Q&A session

Certificates

On successful completion of this training course, HighPoint Certificate will be awarded to the delegates.
Continuing Professional Education credits (CPE): In accordance with the standards of the National Registry of CPE Sponsors, one CPE credit is granted per 50 minutes of attendance.
